On the Meteorological Observations made in Eight Balloon Ascents, By James Glaisheb, Esq., F.R.S., Secretary. Amongst meteorologists, the desire to be among, and to get above, the clouds has been always great, as promising the only satisfactory means of determining the laws of the decrease of temperature with increase of elevation under different states of the sky, the laws of moisture, the circumstances of each formation of cloud, the heights at which they take place, their thickness and the space which separates them, as well as to determine the many currents which may simultaneously exist in the atmosphere. The only sure way of...
