

A Comparison of hp-adaptive Strategies for Elliptic Partial Differential Equations

Filesize: 7.09 MB

Reviews

It is one of my personal favorite books. It is one of the most incredible ebooks I have got through. You will not feel monotony at any moment of your own time (that's what catalogues are for relating to if you ask me).

CreateSpace Independent Publishing Platform. Paperback. Book Condition: New. This item is printed on demand. Paperback. 216 pages. Dimensions: 11.0in. x 8.5in. x 0.5in. The hp version of the finite element method (hp-FEM) combined with adaptive mesh refinement is a particularly efficient method for solving partial differential equations because it can achieve a convergence rate that is exponential in the number of degrees of freedom. hp-FEM allows for refinement in both the element size, h , and the polynomial degree, p . Like adaptive refinement for the h version of the finite element method, a posteriori error estimates can be used to determine where the mesh needs to be refined, but a single error estimate can not simultaneously determine whether it is better to do the refinement by h or by p . Several strategies for making this determination have been proposed over the years. In this paper we summarize these strategies and present the results of a numerical experiment to study the convergence properties of these strategies. This item ships from La Vergne, TN. Paperback.
