Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Mathematics: For Collegiate Students of Agriculture and General Science They include much data taken from agricultural and other experiments, carefully selected to stimulate thinking and to show the application of general principles to problems which actually arise in real life, and in the solution of which ordinary men and women are vitally interested. The book is intended for a course of three hours a week for one year, but it can be shortened to a half-year course. The chapters on statics, small errors, land surveying, annuities, compound interest law, and as many as is desired at the end, can be omitted without breaking the continuity of the course. The first two chapters are more than a mere review. This matter is so presented as to give the student a new point of view. The treatment will show the significance and importance of certain fundamental relations among the concepts and processes of arithmetic and algebra which the student may have used somewhat mechanically in secondary school work. Well prepared students can read these chapters rather rapidly, however. The four place mathematical tables printed at the end of the text have been selected and arranged for practical use as the result of long experience and actual use in computing, and are adapted to the requirements of the examples and exercises in the book. The first edition of this book contained problems, formulas and other matter taken from a large number of sources. Those passages that were directly from other books have now been entirely rewritten; but the book remains indebted to a number of others, notably Skinner, Mathematical Theory of Investment, and Davenport, Principles of Breeding. Other...
