Reviews

This pdf is definitely not easy to get started on studying but quite entertaining to read through. I am quite late in start reading this one, but better then never. Once you begin to read the book, it is extremely difficult to leave it before concluding.

Nothing of this kind is found on ancient British coins; it is a warlike type, the device of a people still in arms against the invader, and the coins are the currency of Gallia while yet unfettered. If coins with the type of the androcephalous horse were often found in Britain we might claim for our primitive ancestors a mintage of their own previous to the Roman invasion. It has been urged, by those who would establish for these British coins a higher antiquity, that they are formed on the Greek model; but they appear to overlook an important fact, that many consular coins are convex and concave, and exceedingly dissimilar in fabric and style to the Roman money after the reign of Augustus, many of whose coins are evidently formed on the Greek model, and are the work of Greek artists. If we compare the denarius of the Gens Marcia with the equestrian figure on the reverse, with the coins inscribed Tinc. or vim. we shall perceive as close a resemblance as may usually be traced between a well-executed model. The unscientific arrangement of these coins by Ruding has planted an error which it will require many years to uproot. The editor of the *Monumenta Historica Britannica* says some of these coins have been claimed by French numismatists as Gaulish. I have only to observe that there is no rivalry as to the claim among the practically informed numismatists of either country. These...
