This book includes 15 exciting tales that are packed with accurate scientific information. Students will thrill to the dramatic, spine-tingling accounts of natural predators in the wild. As they read the stories, they will learn about many of the world's ecosystems from tropical rain forests to the Arctic tundra, from African watering holes to the Pacific reef, from Siberian forests to the Midwest prairie. Each story is followed by suggestions for research and other activities. References on predators and ecosystems are also listed.
