Many observers have argued that a democratic Russia with free markets would be a cooperative bilateral and multilateral partner rather than an insular and hostile national security threat. Concerns about democratization progress appeared heightened after Vladimir Putin became president in 2000. Since then, Russians have faced increased government interference in elections and campaigns, restrictions on freedom of the media, large-scale human rights abuses in the breakaway Chechnya region, and the forced breakup of Russia's largest private oil firm, Yukos, as an apparent warning to entrepreneurs not to support opposition parties or otherwise challenge government policy. Democratization faced further challenges following terrorist attacks in Russia that culminated in the deaths of hundreds of school-children in the town of Beslan in September 2004. President Putin almost immediately proposed restructuring the government and strengthening federal powers to better counter such terrorist threats. The restructuring included integrating security agencies, switching to party list voting for the Duma (lower legislative chamber), eliminating direct elections of the heads of federal subunits, and asserting greater presidential control over civil society by creating a Public Chamber consultative group .
