

The Combustion of Coal and the Prevention of Smoke Chemically and Practically Considered Volume 1 (Paperback)

Filesize: 3.54 MB

Reviews

Absolutely among the best publication I have got at any time go through. It really is written in straightforward phrases rather than hard to understand. Its been designed in an extremely straightforward way which is just soon after I finished reading this publication through which basically modified me, alter the way I believe.

(Mrs. Velda Tremblay)

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1841 edition. Excerpt: .The effect of varying densities, or specific gravities, in gases, is also remarkable on the point of time. Mr. Kelland observes, that the rapidity of mixing is dependant on the relative densities of the gases. Dr. Dalton found the mobility of gases to be inversely as their densities. Dr. Reid proves, that gases of different densities do not mingle rapidly.-jThe experiments of Professor Graham also prove how influential is the difference of density in aiding or retarding diffusion, and he even comes to the conclusion, that the specific gravity of gases can be determined by experiment, on the principle of diffusion, with greater accuracy than by ordinary means. Tho rapidity of mixing is dependant on the relative densities of the gases, and appears, from Mr. Graham s experiments, to be such that the mass which a gas A, in any small time, communicates to the gas 13, is to the mass B which it receives, as tho square root of tho density of A to the square root of the density of B. --Problem 89. t Fill a jar half full of oxygen, and then cautiously fill it up with carbonic acid. Then remove the cork and introduce a suspended candle. It burns brilliantly in the upper stratum of oxygen, but is extinguished in the carbonic acid below, being kindled again, as it is again drawn upwards into the oxygen. Hence gases of different densities do not mingle rapidly with each other, at least,...
