Excerpt from An Elementary Treatise on Modern Pure Geometry The object of this treatise is to supply the want which is felt by Students of a suitable textbook on geometry. Hitherto the study of Pure Geometry has been neglected; chiefly, no doubt, because questions bearing on the subject have very rarely been set in examination papers. In the new regulations for the Cambridge Tripos, however, provision is made for the introduction of a paper on Pure Geometry; - namely, Euclid; simple properties of lines and circles; inversion; the elementary properties of conic sections treated geometrically, not excluding the method of projections; reciprocation; harmonic properties, curvatu In the present treatise I have brought together all the important propositions - bearing on the simple properties of lines and circles - that might fairly be considered within the limits of the above regulation. At the same time I have endeavoured to treat every branch of the subject as completely as possible in the hope that a larger number of students than at present may be induced to devote themselves to a...
